

Environment and Society: Critical Role of Environmental sciences in sustainable development

Guest Lecture

9th June 2022:

An expert lecture on Environment and Society: Critical Role of Environmental sciences in sustainable development by Dr. Sangeeta Ingole was conducted successfully for the second- third- and fourth-year students of Civil engineering department under the Institutes of engineer's student's chapter and in association with Indian water works association. The guest lecture was an informative and productive session meant for realization to students about the importance of environment and society. It was indeed a informative session

The expert lecture was conducted on June 9th in the civil department of government college of engineering Amravati, this lecture was organised by Institutes of engineers student's chapter in association with Indian water works association. This lecture was scheduled at 4:00 pm, all the students, teaching faculties were present for the event. Ms Sangeeta Ingole guided us about the importance of environment and society. She guided and encouraged students for helping in protection of environment by adopting sustainability. She also shared his personal experiences in the field, challenges she faced and a guided the students very well.

This event was not possible without guidance of the faculty in-charge Prof. S. P. Tak assistant professor in civil department along with IOE convenors, co-convenors and members. This session was conducted with a very profound enthusiasm. The students, teaching and non-teaching faculty were working continuously behind the stage, to make this event possible.
